

## Nonstate Submissions

The Governor regrets to announce that nonstate agency applications will not be accepted for consideration as part of his amendments to the 2008 Appropriation Act which will be presented to the General Assembly on December 17, 2008. The October revenue forecast results in the general fund appropriations in FY 2009 exceeding the forecast by more than \$950 million. Cooperative efforts to eliminate this shortfall have required difficult decisions by all levels of state government. State agency budget reduction plans for FY 2009 are currently being implemented to offset the shortfall. Thank you for your efforts and the services you provide for the citizens of Virginia.
