Fall 2020 Consensus Forecasting Process

- ***Joint Advisory Board of Economists*** (JABE) met November 4.
 - Most JABE members thought the VA standard forecast was the most likely and sufficiently pessimistic in fiscal years 2021 and 2022.
 - The October standard forecast had less of a downturn than the interim June standard outlook for FY21 and is similar to FY22.
 - 8 of the 12 members recommended the standard forecast for FY21 and FY22.
 - The October pessimistic forecast is similar to the June standard forecast for FY 21, which was the basis for the interim revenue forecast.
- ***Governor's Advisory Council on Revenue Estimates*** (GACRE) met November 23.
 - Members evaluated the new JABE recommended forecast – now the standard outlook, revenue collections through October, and the associated revenue forecasts for the FY20-22 biennium.
 - At the GACRE meeting, 6 business members voted for the standard plus, 7 members for the standard, and 3 members for the standard minus. Many members were more optimistic than they were in August.

Data Now Suggest That the Recovery Started in May – Making the 2020 Recession the Shortest on Record

- GDP contracted 5.0 percent in the first quarter and 31.4 percent in the second quarter of 2020 with unemployment peaking at 13.0 percent.
- Compared to the June standard, in the October standard both the 2nd and 3rd quarters of 2020 performed better than originally estimated when COVID-19 first affected the economy.
