Introduction

About these budget execution year-end close instructions

This package provides instructions to close out FY 2019 from a budget execution perspective, as offered by the Department of Planning and Budget (DPB). In the past, our agency has provided instructions for year-end close AND new year start-up in one package. However, details regarding the passage of the next-year budget are not always known in time for the year-end close instructions to be distributed on a timely basis, as was the case last year for the 2018-2020 biennium. Also, we believe clarity is increased by separating the two topics. For these reasons, we will issue year-end close instructions and new year start-up instructions separately, even though the timing of their releases may coincide.

It should be noted that the Department of Accounts (DOA) will be distributing a separate memorandum detailing accounting procedures and payroll information for year-end close. Do not confuse these instructions as a substitute for DOA's instructions.

The following are definitions of key terms used in these instructions:

- **FY 2019** means the fiscal year beginning July 1, 2018, and ending on June 30, 2019.
- **FY 2020** means the fiscal year beginning July 1, 2019, and ending on June 30, 2020.
- **Chapter 854** means the Act to amend and reenact Chapter 2 of the 2018 Acts of Assembly, and is now the Appropriation Act for the 2018-2020 biennium, as passed by the 2019 Session of the General Assembly.

If you encounter any problems or need specific advice or assistance, please contact your budget analyst.

Budget execution year-end close dates

The significant budget deadlines for year-end close are as follows:

<i>Date</i>	<i>Action</i>
June 14, 2019	Deadline for agencies to submit execution transactions for FY 2019
June 14, 2019	Deadline for agencies to submit capital project review work items in the Performance Budgeting system

About the later release of FY 2020 Start-Up budget instructions

As stated earlier, FY 2020 Start-Up instructions will be released soon, if not simultaneously with these instructions, and will provide key dates and detail guidance for the appropriation and reappropriation of funds, Central Appropriation and Part 3 transfers, special higher education issues, and capital projects issues including maintenance reserve requirements.

Final FY 2019 Appropriation and Allotment Actions

Deadline for FY 2019 execution transactions

The deadline to submit budget execution adjustments in the Performance Budgeting system to DPB for FY 2019 appropriation and allotment actions, both operating and capital, is:

5:00 p.m., June 14, 2019

Upon receipt and approval, DPB will process the final FY 2019 actions and transmit them to the Department of Accounts (DOA). Agency pending budget execution adjustments that no longer need processing should be voided in the PB system before the closing date. After this date, agencies will no longer be able to submit FY 2019 budget execution adjustments in the PB system. You will, however, have access to Performance Budgeting system reports after the deadline to allow you to view voided or completed transactions.

Capital Projects

Review of Active Projects

All active capital outlay projects, including projects authorized in prior biennia or under §4-4.01 I. of the General Provisions of the Appropriation Act, must be reviewed to identify projects that either i.) have been completed and can be closed out with all remaining appropriation balances reverted, or ii.) are active projects with unobligated appropriation balances that can be reverted. As a result of this review, agencies are required to submit a report through the PB System for **only those projects that are ready to be closed out or for which some unobligated balances can be reverted**.

Entries must be submitted by **June 14 2019**, for each project identified to be closed or have unobligated balances reverted using the Capital Project Review module.

Using the Capital Project Review Module:

To submit entries in PB, find the Capital Project Review module in the PB System by placing your cursor over the “Capital Budget” tab. Then, from the drop-down list of tasks displayed, place the cursor over “Capital Project Review” and, click on “Capital Project Review” from the list of tasks displayed. Use the following steps to complete a submission **for each project to be closed or with unobligated balances to be reverted**:

1. Enter agency code.
2. Select project from drop down list.
3. Project title field should automatically fill.
4. Year field should default to 2019.
5. Carryforward type field:
 - a) Select “B” if the project is to remain active, but some balances can be reverted.
 - b) Select “C” if the project is to be closed and all balances reverted.
 - c) Note that if type “A” (remain active and no balances reverted) is applicable, no action is needed. You do not need to complete a capital project review work item for carryforward type “A” projects.
6. Entries in the “Total Amount to be Reverted” Section should include a separate row for each fund detail applicable to the project for the following two fields:
 - a) “Current Project Budget” field: Reflect the current available appropriation amount for each fund detail. Note that this field will auto-populate with the amount of appropriation the project had *at the beginning of FY 2019*, by fund detail, and is not necessarily reflective of the current appropriation balance . Therefore, you will need to identify the current appropriation in either Cardinal or the project’s [operating plan](#) by fund detail and make any necessary changes in order to reflect the current available appropriation amount by fund detail.
 - b) “Amount” field:
 - (1) If you selected “B” (active, partial reversion) in the Carryforward type field, enter the amount of appropriation to be reverted for each fund detail; or
 - (2) If you selected “C” (closed, complete reversion) in the Carryforward type field, enter the amount of the balance anticipated to be available on June 30, 2019 for each fund detail. (For projects designated to be closed, the Department of Accounts will revert the entire June 30 balance.)
7. To submit entries to DPB, follow the instructions in the Help feature in the PB System on how to submit to DPB.

Agencies must complete their entries **no later than June 14, 2019**.

Sometime in early August, DOA and DPB will bring forward into FY 2020 the June 30, 2019, capital project appropriation balances for those amounts not identified for reversion in the Capital Project Review process described above. Prior to this reappropriation, DOA will calculate 75 percent of the current appropriation/allotment balance in mid-June, and will process an entry in FY 2020 to grant the calculated amount of appropriation/allotment to each applicable capital project. This will enable project expenditures to continue until the carryforward of capital balances has been completed.

You may run a report of your Capital Project Review submissions by clicking on the “[BE2.40 - Capital Project Review](#)” report within the Performance Budgeting system reports menu. This report contains a simple listing of active capital projects along with an indication of whether a Capital Project Review work item has been completed for a project. A snapshot of a sample report is shown on the next page.
